PROFESSIONAL SUMMARY

2nd-year Software Engineering student at SZABIST Karachi (CGPA: 3.2, Batch 2028) with hands-on experience building RESTful APIs and real-time backend systems. Proficient in Node.js, Express.js, MongoDB, PostgreSQL, and Socket.IO with proven ability to solve complex challenges including concurrency handling via MongoDB ACID transactions and real-time sync under 100ms. Certified in Backend Development & APIs by freeCodeCamp (2025). Self-directed, and eager to contribute to real-world backend projects in a remote collaborative environment.

PROJECT

E-Shop REST API Personal Project · 2024. [Repository](#)

- Built a RESTful API with JWT-based user authentication and role-based access control
- Identified and fixed a concurrency bug in inventory updates using MongoDB ACID transactions, eliminating duplicate order entries under simultaneous requests
- Tested all endpoints using Postman and managed version control with GitHub

Stack: Node.js, Express.js, MongoDB, Mongoose, JWT

Real-Time Multiplayer Chess Game · 2024. [Repository](#)

- Built the full server-side game logic including move validation and turn management
- Synced live board state across 2 concurrent players in under 100ms using Socket.IO rooms
- Managed game sessions and player connections on the backend

Stack: Node.js, Express.js, MongoDB, Socket.IO

Real-Time Group Chat Application · 2024. [Repository](#)

- Built user authentication system with login and session handling
- Stored message history in MongoDB with a schema designed for scalability
- Handled real-time message delivery across multiple users using Socket.IO

Stack: Node.js, Express.js, MongoDB, Socket.IO

EDUCATION

Bachelor of Science in Software Engineering

SZABIST University, Karachi | CGPA: 3.2 | 2028 Batch

CERTIFICATION

Back End Development and APIs · [Certificate](#) · freeCodeCamp · 2025

INDUSTRY ENGAGEMENT

SDLC Industry Session Organizer SZABIST University · December 2025

- Proactively reached out to a Development Manager at Astrik Software, planned and executed an industry session on Agile and Waterfall methodologies, generating insights on software development practices for students
- Coordinated logistics, prepared a presentation report, and communicated with stakeholders to ensure smooth delivery for 50+ attendees

UN SDGs Workshop Volunteer IDEAL English School · December 2024

- Co-organized a UN SDGs awareness workshop by conducting research on global trends, preparing educational materials, and presenting findings to high school students on behalf of the CS Department
- Conducted a quiz and awarded certificates to top performers

SKILLS

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication

Database: MongoDB, Mongoose, PostgreSQL

Languages: JavaScript, Java, HTML/CSS

Tools: GitHub, Postman, VS Code, IntelliJ, Microsoft Office Suite (Word, Excel, PowerPoint), Agile, Waterfall

Concepts: OOP, REST Architecture, Agile, SDLC, Database Design, Concurrency Handling, Error Handling, Middleware, Version Control, Debugging, Real-Time Data Processing, API Security, ACID Transactions, Software Testing (Postman), MVC Architecture
